CHARACTER PROFILES

AOI FUKASAKU

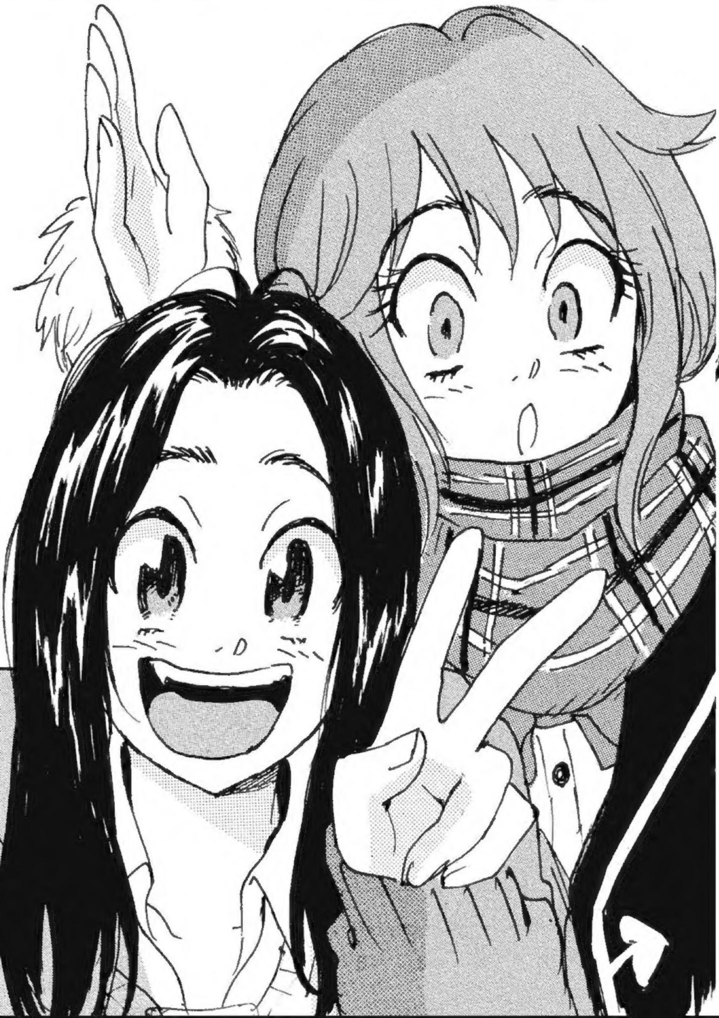
(HIGH SCHOOL FIRST-YEAR)

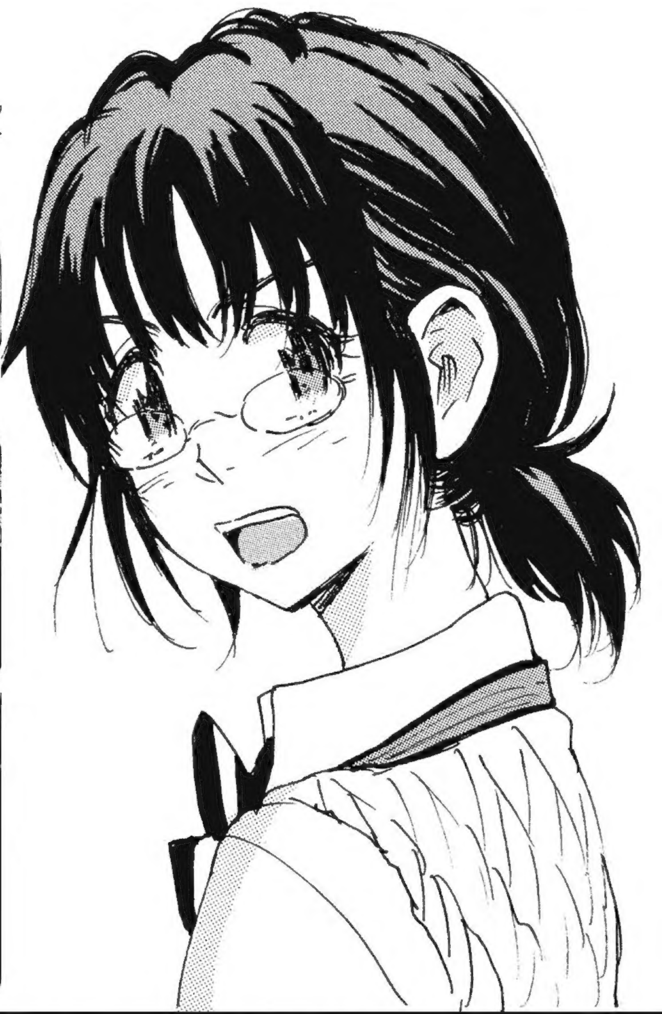
The Medical Unit's cheerful icebreaker. Aoi has a bottomless stomach and a bright personality, but was thought to be a useless, poor student otherwise—except a mysterious power sleeps inside her, as the "complete" Coppelion...

IBARA NARUSE

(HIGH SCHOOL THIRD-YEAR)

Leader of the Coppelion Medical Unit. She possesses staggering athletic ability, and her combat skills are excellent. Relying on her strong conviction to save everyone in Tokyo to give her strength, she leads the search for survivors. Her speech can be a bit rough.





OZU SISTERS

(HIGH SCHOOL THIRD-YEARS)

Twin sisters in the Cleanup Crew. Kanon (right), the older sister, can generate lightning, and Shion (left), the younger sister, has super strength. They're both incredibly violent, but reformed after their battle with Ibara.

TAEKO NOMURA

(HIGH SCHOOL FIRST-YEAR)

The Medical Unit's comforting member. She's quite knowledgeable and has superhuman senses (she wears glasses to reduce her eyesight to 10% of its true strength, because she sees too far). She loves animals.

ELION

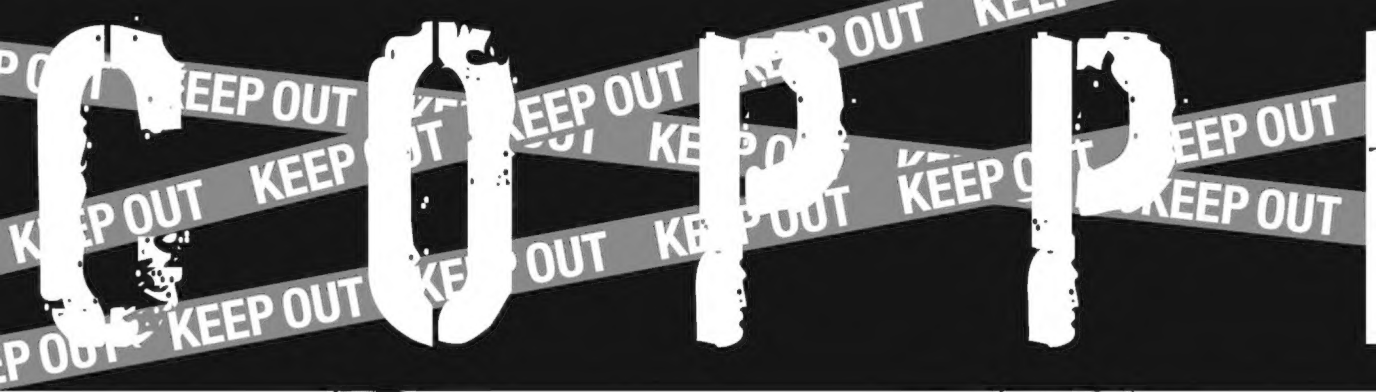
CHARACTER PROFILES

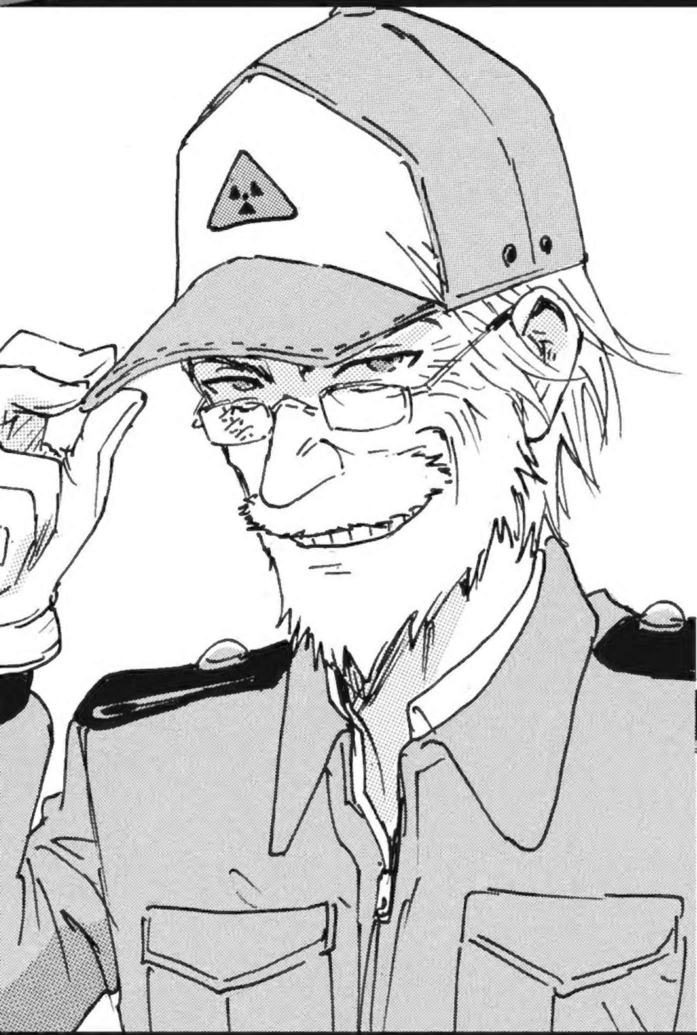
MANA TSUBURAYA
(HIGH SCHOOL SECOND-YEAR)

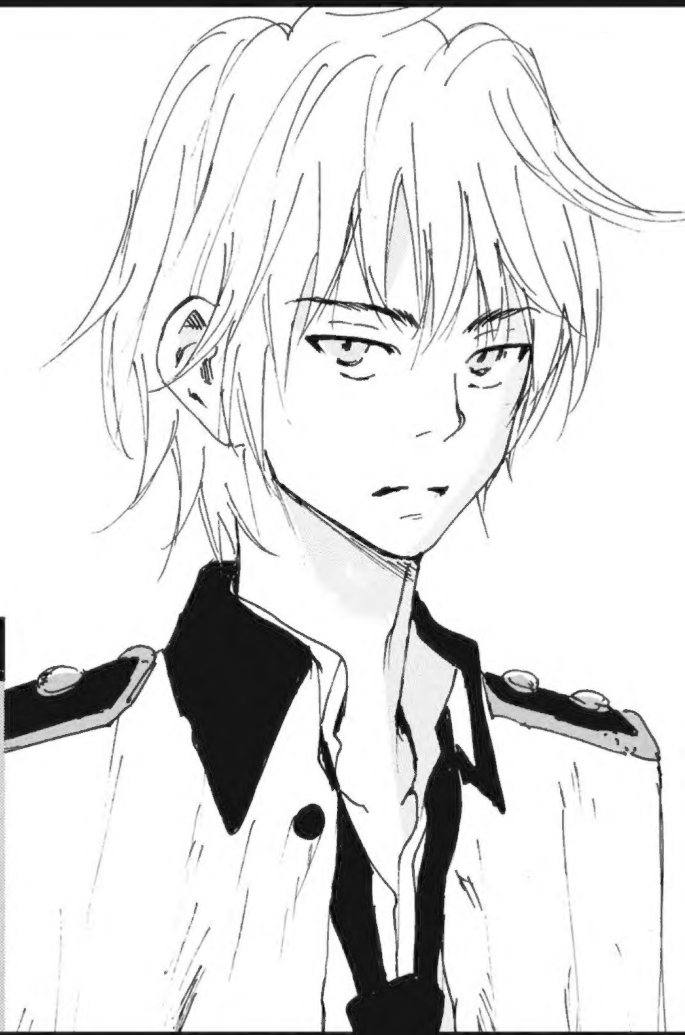
A second-year Coppelion. She's a defect with a "bug"—her body releases neutrons. She possesses incredible power. She's best friends with Meisa Ichikawa, but is currently working with Ibara and company.

MEISA ICHIKAWA
(HIGH SCHOOL SECOND-YEAR)

A second-year Coppelion. She can disassemble and reassemble her body at the atomoic level, a power which she calls "particle break." She's working under Dr. Coppelius against Ibara and the others so that he'll fix the second-years' defect. She likes online games.







DR. COPPELIUS

The mad scientist who created the Coppelion. He's using the second-years to help carry out his "grand plan." His target: Aoi Fukasaku, the complete Coppelion. Equipped with "aether plus," a refined version of aether, he lurks in the darkness of Tokyo...

HARUTO KUROSAWA

(HIGH SCHOOL THIRD-YEAR)

The leader of the Cleanup Crew, and Dr. Coppelius' clone. He has a brilliant mind and always keeps his cool. He was thought to have died during the Musashino Railway Operation, but is back in action thanks to his ultra-regeneration powers.

How badly has the shelter been contaminated?!
It's still within acceptable levels.
As long as the survivors wear their hazmat suits, and don't touch the water, there's no issue.
R-Really? Thank goodness!
We already shut off the water valves to the center dome and are on high alert.
Shelter 109 is done for.
We have to proceed with the evacuation plan ASAP.

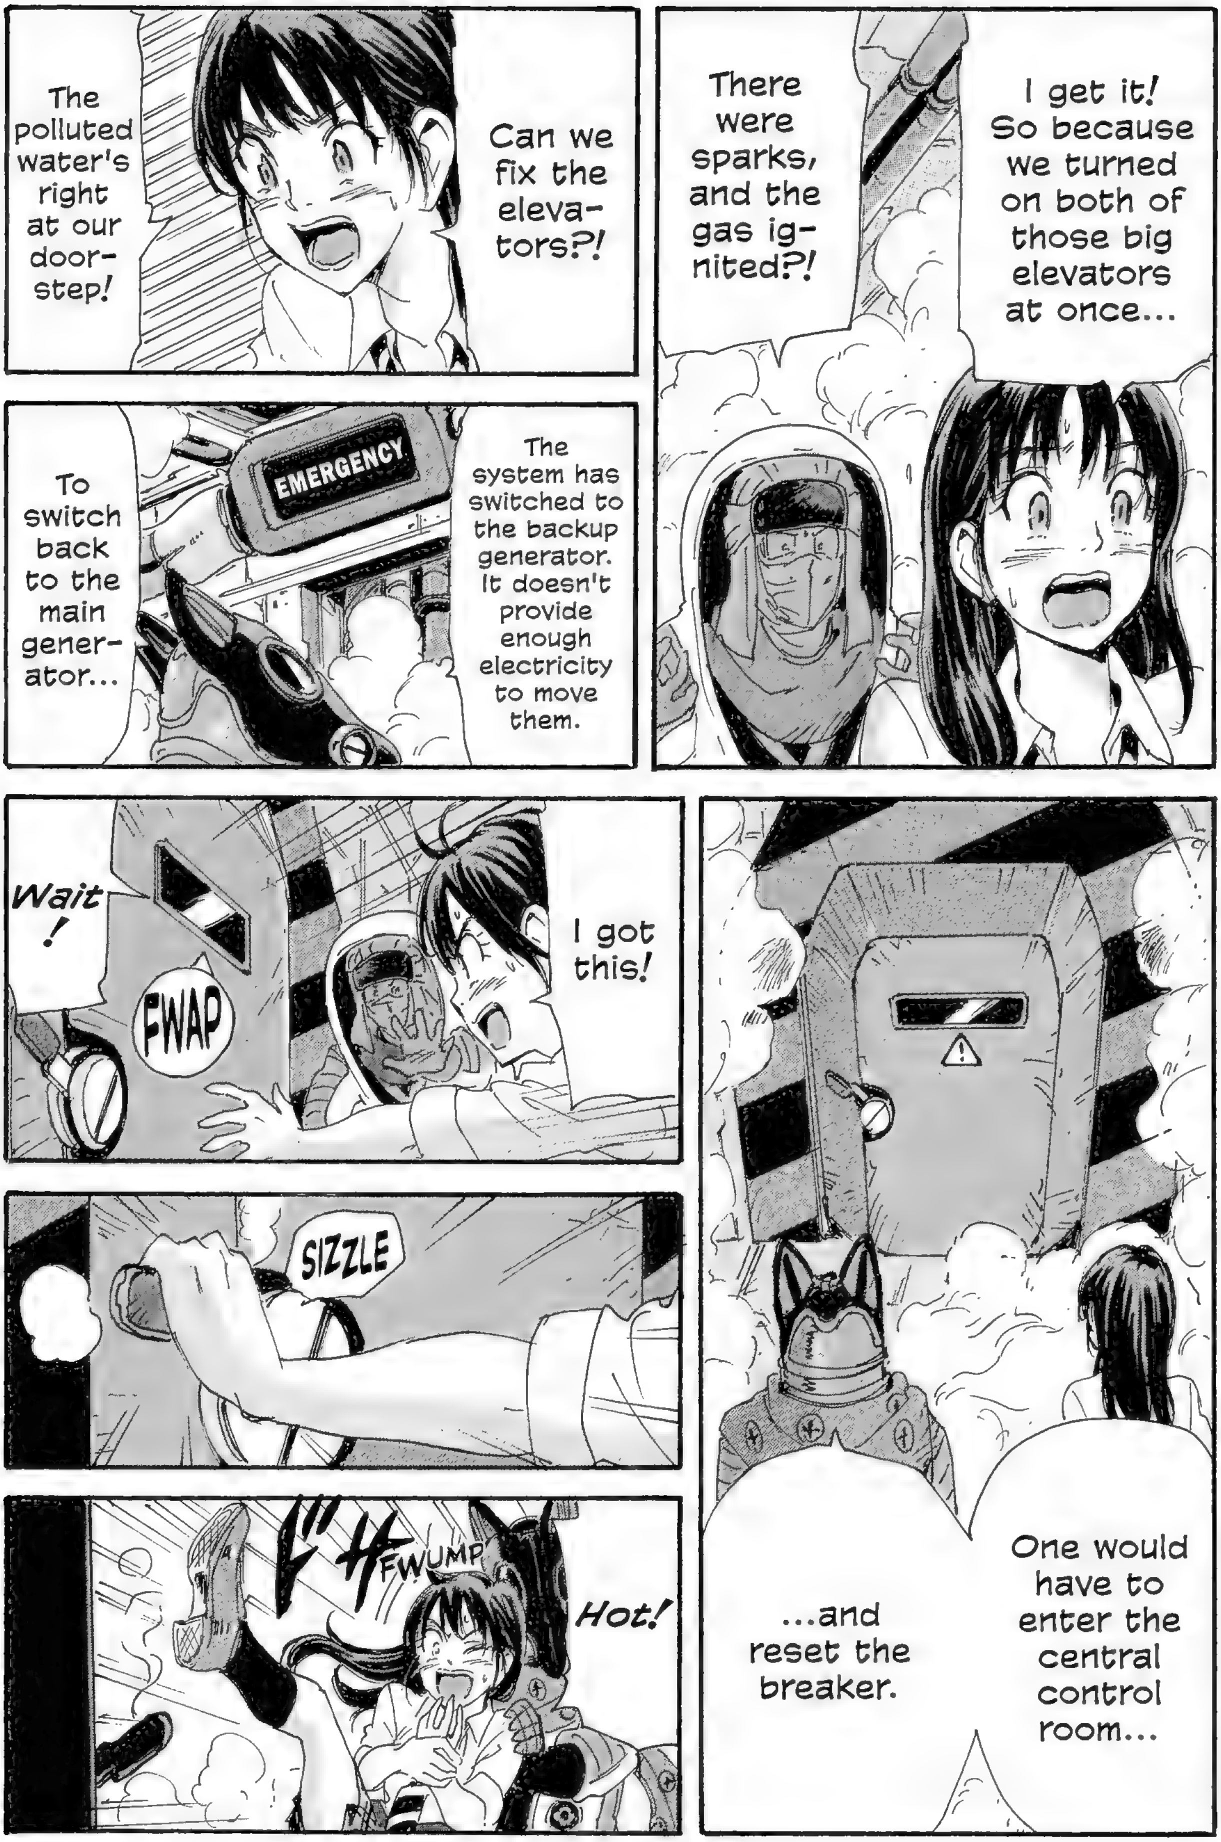
Mr. Maskmaker?!
The increased electrical load created sparks in the control room.
There must have been a natural gas leak...



I get it! So because we turned on both of those big elevators at once...
There were sparks, and the gas ignited?!
Can we fix the elevators?!
The polluted water's right at our doorstep!

The system has switched to the backup generator. It doesn't provide enough electricity to move them.

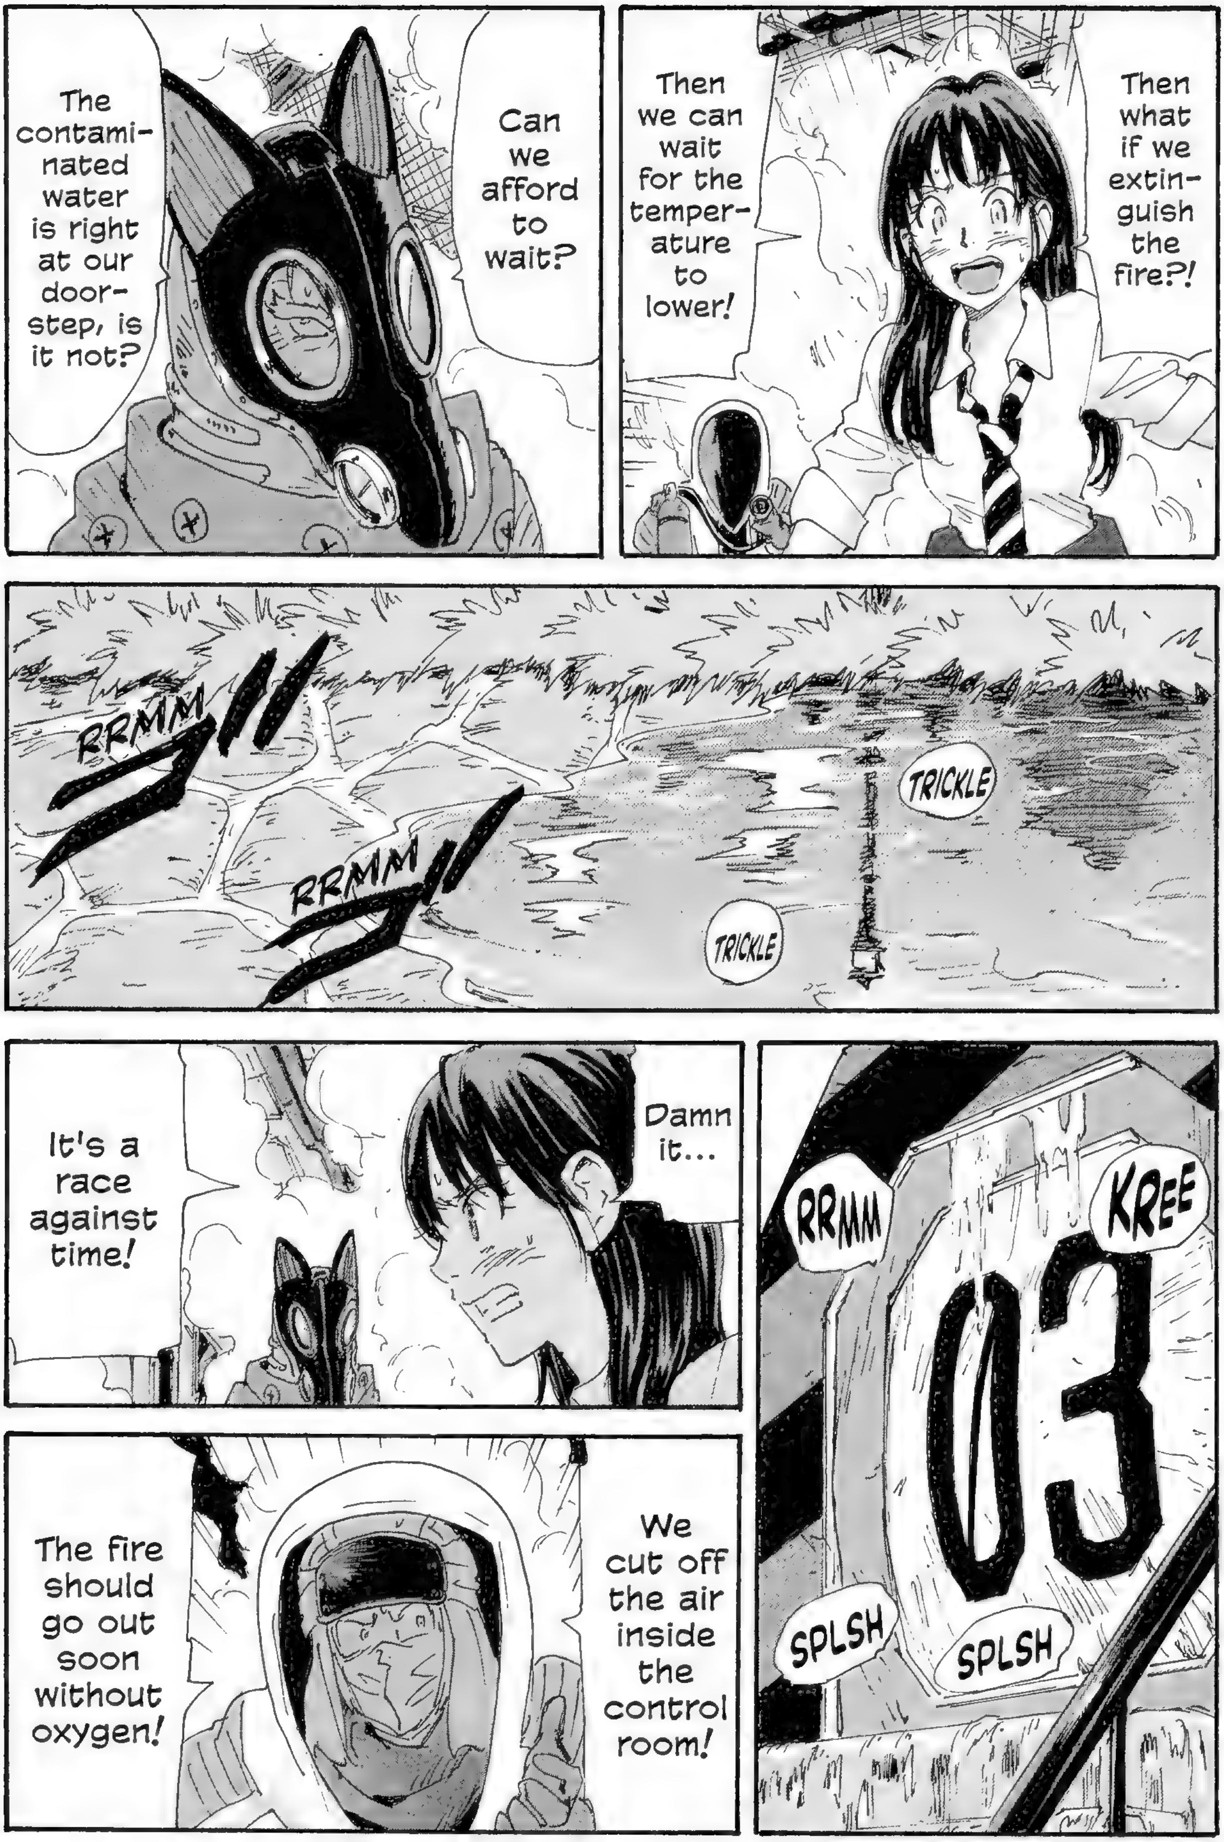
All of the elevators are offline while the system is on the backup generator.
Without the main generator, neither the survivors nor the Edon Type-O will be leaving Shelter 109.
However, because of the fire, the temperature in the central control room is extreme.
Even with a fire proximity suit, no one could last longer than one minute before suffering severe burns.



Then what if we extinguish the fire?!
Then we can wait for the temperature to lower!
Can we afford to wait?

The breaker is inside the core plant connected to the power station.

In all likelihood, the fire will be in the secondary area surrounding the core.
You'll need to go straight through it.
